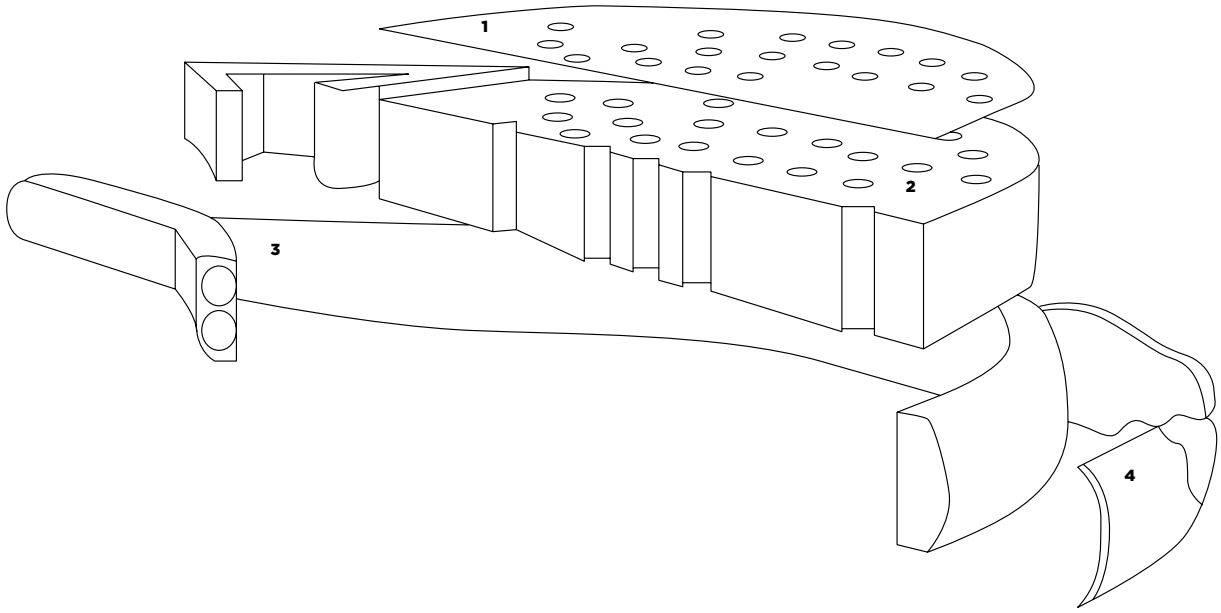
PADEL Rackets



TECHNICAL FEATURES

1 The top layer consists of Kevlar + Carbon in the Masterpiece racket and 3K + Carbon in the Mastwork racket.

2 The central core is composed of SOFT EVA, acronym for ethylene vinyl acetate, a rubber with a high impact absorption power, in order to make them more comfortable for the arm.

3 The frame is instead in 100% carbon, a fiber that is processed to form black ribbons that are intertwined to create a light weft which, once inserted into the structure, makes it very hard and impact resistant.

4 Acerbis padel rackets are also equipped with an external protection, called Protector (included in the box) which, in addition to protecting the upper layer, acts in anti-shock mode.

Product care:
Dry the rackets off in case of contact with water.
Keep the rackets away from heat sources.
Store them inside the Acerbis MASTER Padel Bag in the specially provided thermal pocket.

CARATTERISTICHE TECNICHE

1 Lo strato superiore è composto da Kevlar + Carbon nella racchetta Masterpiece e 3K + Carbon nella racchetta Mastwork.

2 Il nucleo centrale è composto da SOFT EVA, acronimo di etilene vinil acetato, una gomma con un alto potere di assorbimento degli impatti, in modo da renderli più confortevoli per il braccio.

3 Il telaio è in carbonio al 100%, fibra che viene lavorata fino a formare dei nastri neri che vengono intrecciati tra loro per realizzare una trama leggera che, una volta inserita nella struttura, la rende molto dura e resistente agli urti.

4 Le racchette da Padel di Acerbis sono inoltre dotate di una protezione esterna, definito Protector (incluso nel box) che, oltre a proteggere lo strato superiore, agisce in modalità anti-shock.

Uso e manutenzione del prodotto:
Asciugare le racchette in caso di contatto con l'acqua.
Tenere le racchette lontano da fonti di calore.
Conservarle all'interno dell'apposita borsa Acerbis MASTER Padel Bag nella tasca termica appositamente prevista.

INFLATION GUIDE AND INFO

GUIDA AL GONFIAGGIO E INFORMAZIONI

01

WEATHER CONDITIONS
Can stand up to play in all weather conditions.
Highly water-resistant surface.
CONDIZIONI ATMOSFERICHE
Pallone utilizzabile in qualsiasi condizione atmosferica.
Superficie altamente resistente all'acqua.

02

STORAGES
Store the ball at reduced pressure
in a dry ventilated room at 20-25°C.
CONSERVAZIONE
Conservare il pallone, a una pressione ridotta, in un locale ventilato e asciutto, ad una temperatura di 20-25°C.

03

CHECK PRESSURE
Recommended Pressure (BAR).
CONTROLLO PRESSIONE
Pressione raccomandata (BAR).

04

INFLATE
Drip 1-2 drops of valve-oil into the valvehole. It is important that valve oil is used as it makes the valve hole flexible and seals more tightly.
GONFIAGGIO
Posizionare una o due gocce di olio sulla valvola. È importante utilizzare l'olio in quanto rende flessibile il foro, favorendo l'inserimento dell'adattatore.

05

CLEANING AND DRYING
The football has to be cleaned with soapy water using a mild soap. Then wipe the ball off with a towel and let it fully dry in an airy place at 20-25°C.
PULIZIA E ASCIUGATURA
Il pallone deve essere lavato con acqua e sapone, utilizzando un detergente delicato. Dopo il lavaggio, utilizzare un panno per l'asciugatura e lasciarlo in un luogo completamente aerato ad una temperatura di 20-25°C.

LAVAGGI E TRATTAMENTI

WASHING AND TREATING

To guarantee the highest quality standards, ACERBIS carries out a series of tests on the raw materials used in each garments, in its internal and accredited laboratories. Our technicians recommend strictly following the instructions on the maintenance label. This will ensure that the performance characteristics of the fabrics will last over time.

GENERAL RECOMMENDATIONS MAINTENANCE

- Prevent dirt from getting into the fabric.
- Wash the garment as soon as possible.
- In case of particularly stubborn stains, put some detergent directly on the affected area, leave it to act for a few minutes and then proceed with the washing operations indicated on the maintenance label.
- If the garment is particularly dirty, allow it to soak with water and detergent in a basin for a couple of hours before proceeding with the washing operations indicated on the maintenance label.
- Wash colored garments separately and wash light colored garments separately from dark ones.
- It is advisable to turn each garment inside out before washing.
- Before washing check that all zips are closed and all fastening fastened correctly to prevent other garments from coming into contact with these accessories, risking injury to the fabric.
- Wash separately garments and Velcro accessories.

LAVAGGI E TRATTAMENTI

Per garantire un livello elevato di standard qualitativi ACERBIS effettua nei laboratori interni ed accreditati una serie di test sulle materie prime che compongono ogni singolo capo di abbigliamento. I nostri tecnici suggeriscono di seguire scrupolosamente le indicazioni riportate sull'etichetta di manutenzione. In questo modo le caratteristiche di performance dei tessuti rimarranno più durature nel tempo.

CONSIGLI GENERALI PER LA MANUTENZIONE

- Evitare che lo sporco penetri nel tessuto.
- Lavare il capo appena possibile.
- In caso di macchie particolarmente persistenti, versare del detersivo direttamente sulla zona interessata, lasciare agire per qualche minuto e poi procedere con il lavaggio riportato nell'etichetta di manutenzione.
- Se l'indumento è particolarmente sporco, prevedere un ammollo con detersivo in una bacinella per un paio d'ore prima di procedere al lavaggio riportato nell'etichetta di manutenzione.
- Lavare separatamente i colorati e gli indumenti chiari da quelli scuri.
- Lavare preferibilmente al rovescio ogni capo di abbigliamento.
- Prima del lavaggio assicurarsi di aver chiuso correttamente cerniere e zip per evitare che altri capi di abbigliamento vengano a contatto con questi accessori rischiando lesioni nel tessuto.
- Lavare singolarmente indumenti e accessori provvisti di Velcro.

APPLICATION INSTRUCTION FOR TRANSFER PRINTS

- Suggested maximum application temperature: 150°.
- Dwell time and pressure according to the recommendation of the transfer print supplier.
- After print application, fabric has to be cooled down before being removed from the iron plate.
- White and light colored heat transfers must have an anti-migration backup layer when applied on colored fabrics.
- Fabrics may not be pressed directly in order to avoid pressing marks.
- Insert barrier material between the garment and the press for protection.
- It is not recommended to use the press where a print has previously been applied, as if it were to come into contact with the heat of the press, the print itself could be damaged.
- White and colored garment parts should not be in direct contact during print fixation.
- It is recommended to always use a rubber anvil in the size of the heat transfer to avoid that hot heat plate is touching the whole fabric.

ISTRUZIONI PER L'APPLICAZIONE DI TRANSFER PRINT

- La temperatura massima consigliata per l'applicazione è 150°.
- Pressione e temperatura devono essere modulate in base alle indicazioni del fornitore della stampa.
- Dopo l'applicazione della stampa, il tessuto deve essere raffreddato prima di essere rimosso dalla piastra.
- Le stampe bianche o di colore chiaro devono avere uno strato anti-migrazione sul retro, se applicate su tessuto colorato.
- Il tessuto non deve essere pressato direttamente senza strati intermedi perché potrebbe riportare segni dovuti al calore.
- Inserire sempre uno strato che faccia da barriera tra il tessuto e la pressa.
- Si sconsiglia di utilizzare la pressa dove precedentemente è stata applicata una stampa, in quanto se dovesse entrare in contatto con il calore della pressa la stessa stampa potrebbe risultare danneggiata.
- Parti bianche e parti colorate dello stesso capo non devono entrare in contatto diretto durante l'utilizzo della pressa.
- Si consiglia di utilizzare sempre un supporto in gomma della dimensione della stampa da posizionare sotto al tessuto, in modo che la pressa calda non entri in contatto con tutto il tessuto.

DRY SYSTEM

ACERBIS DRY SYSTEM
A high breathability therefore promotes air circulation between the external environmente and the garment itself. For optimal comfort during sports (and more), it is always essential to wear garments whose fabrics are perfectly breathable. Sweat must dry quickly so as not to remain in contact with the skin for a long time, thus allowing natural body heat regulation, reducing energy expenditure, providing great comfort and keeping the skin always fresh and dry. Garments made with the Acerbis Dry System treatment are perfect both in winter, because they help keep the muscles warm, and in summer, because they dry quickly, allowing you to maintain a feeling of freshness.

ACERBIS DRY SYSTEM
Per un comfort ottimale durante l'attività sportiva (e non solo) è indispensabile indossare capi i cui tessuti siano perfettamente traspiranti. Il sudore deve infatti asciugare rapidamente per non rimanere a lungo a contatto con la pelle: in questo modo è possibile ottenere una naturale termo-regolazione corporea, riducendo il dispendio energetico, garantendo maggiore comfort e mantenendo la pelle sempre fresca ed asciutta. I capi realizzati con il trattamento Acerbis Dry System sono dunque perfetti sia in inverno, perché aiutano a mantenere caldi i muscoli, sia in estate, perché si asciugano rapidamente consentendo di mantenere una sensazione di freschezza.

ANTIBACTERICAL TREATMENT
A treatment carried out on the fabric and designed to counteract bacterial proliferation. This technology represents an additional precaution from a health point of view, as it allows you to maintain ideal hygienic conditions and avoid the formation of unpleasant odors, without altering the appearance of the fabric in any way.

ANTIBACTERICAL TREATMENT
Un trattamento effettuato sul tessuto e studiato per contrastare la proliferazione batterica. Questa tecnologia rappresenta un'ulteriore precauzione dal punto di vista sanitario, in quanto consente di mantenere inalterate le condizioni igieniche e di evitare la formazione di odori sgradevoli, senza alterare in alcun modo l'aspetto del tessuto.

3 FABRIC

SUBLIMATION PRINTING
Sublimation printing is an indirect printing process that involves the design being transferred to the fabric through sublimation. It is realized thanks to special printers that use specific sublimation inks to impress the desired design on a special support. Subsequently, the printed paper is coupled to the fabric and the design is transferred using machines that, by exerting the right pressure at the correct temperature, sublimate the colors by impressing the desired design on the fabric.

SUBLIMATION PRINTING
La stampa sublimatica è un processo di stampa indiretto che prevede che il disegno venga trasferito sul tessuto attraverso la sublimazione. Viene realizzato grazie a particolari stampanti che utilizzano specifici inchiosti sublimatici per imprimere su un apposito supporto il disegno desiderato. Successivamente la carta stampata viene accoppiata al tessuto ed il disegno viene trasferito utilizzando macchinari che, esercitando la giusta pressione alla corretta temperatura, fanno sublimare i colori imprimendo il disegno desiderato sul tessuto.

EMBOSSED
The term embossing refers to a particular relief printing technique. The fabric is introduced into specific machines which, by exerting the right pressure on it at the right temperature, print the intended design by creating a glossy and matt effect.

EMBOSSED
Con il termine embossing si indica una particolare tecnica di stampa a rilievo. Il tessuto viene introdotto in specifici macchinari che, esercitando sullo stesso la giusta pressione alla corretta temperatura, imprimono il disegno desiderato creando un effetto di lucido e opaco.
